Producing clear technical documentation and accessible system navigation guides and supporting the creation of help tools.

Reviewing software to ensure compliance with security standards and design principles, highlighting any deviations or risks.

Collaborating with colleagues across CDIO to deliver bespoke tools and support wider digital initiatives.

Working with the support team to create knowledge articles, resolve complex issues, and take ownership of cases escalated beyond first-line support.

Preparing for and attending stakeholder and team meetings, which may involve occasional travel and overnight stays.
