About the job

Job summary

About us

GCHQ is an intelligence, cyber and security agency with a mission to keep the UK safe. We use cutting-edge technology, ingenuity and partnerships to identify, analyse and disrupt threats. Working with our intelligence partners, MI5 and MI6, we protect the UK from terrorism, cyber-attacks and espionage.

At GCHQ, you'll do varied and fascinating work in a supportive and inclusive environment that places a strong emphasis on teamwork.

The National Cyber Security Centre (NCSC), part of GCHQ, is the UK Government's lead authority on cyber security. The organisation is at the heart of the Government's cyber security strategy and aims to make the UK the safest place to live and work online.

Job description

The role

AI is transforming how organisations design, build and defend technology and the NCSC is looking for outstanding technical talent to help protect the UK in ways that only we can. Join us to research, develop and deploy agentic solutions that strengthen the nation's cyber security and resilience.

As an AI technologist, you'll contribute to our unique mission while working in classified environments alongside people who share a commitment to

protecting the UK. You'll help design, build, deploy and scale intelligent solutions that transform how people work, learn and interact with technology.

Working as part of multidisciplinary teams and alongside some of the world's leading cyber experts, you'll help advance AI capabilities and turn innovative ideas into production-ready systems. Depending on your skills and interests, work may involve agentic systems, conducting technical research, applying AI to cyber security challenges, engineering secure solutions, supporting the adoption of AI in operational environments, or providing technical insight to government and industry partners.

These broad roles support a wide range of GCHQ and NCSC missions across engineering, operations and applied research. Opportunities span the development and assurance of AI-enabled systems, AI and cyber security research, software and infrastructure engineering, MLOps, solution architecture, and the secure deployment of emerging technologies. As your expertise grows, you may also engage with leading organisations across industry and academia, helping to ensure we remain at the forefront of AI innovation.

This is an opportunity to contribute to one of the most significant technological shifts of our time as part of the UK's National Technical authority for cyber security. We're looking for people who can combine technical expertise with curiosity, collaboration and a passion for solving complex challenges. If you're excited by emerging technologies and want to help shape how the UK securely harnesses AI, these roles offer the opportunity to make a meaningful impact on national security.

Person specification

About you

We're looking for curious and motivated individuals with foundation-level experience in the development and application of AI technologies and/or agent development. You'll bring a genuine enthusiasm for cyber security and a desire to continuously learn about emerging technologies, threats and a broad range of cyber topics. You may have gained experience through software development, designing and building systems and architectures, or technical research and analysis, whether through work, study or personal

projects. The ability to quickly grasp unfamiliar concepts and apply them in practice will be important.

Success in these roles requires a collaborative approach and a willingness to work across different technical disciplines, building relationships with colleagues and stakeholders from across and beyond the organisation. Curiosity, adaptability and a commitment to developing new skills will be highly valued.

We welcome applications from people of all educational and professional backgrounds and have no formal qualification requirements. Instead, we're interested in evidence of your technical ability, potential and achievements. Depending on the role and your skills, you may be eligible for specialist pay. These roles require 80% office attendance, subject to role requirements and business need.

Please note: The NCSC is advertising a number of roles at the moment. Please submit an application for each role you wish to be considered for. Applying for other roles will not be detrimental to your application for this role and, if you are successful in a number of roles, you will be able to choose which role you prefer at the point of conditional job offer.

GCHQ Competencies

As part of the selection process, the NCSC will assess you using competencies aligned with those used across the UK Intelligence Community. These are closely based on the Civil Service Behaviours, so if you're familiar with those, you're already on the right track.

At Level 2, we'll be looking at how you demonstrate the following:

Driving Innovation and Change (Civil Service Behaviour Equivalent: Changing and Improving)

Continuously Developing (Civil Service Behaviour Equivalent: Developing Self and Others)

Working Collaboratively (Civil Service Behaviour Equivalent: Working Together)

Making Effective Decisions (Civil Service Behaviour Equivalent: Making Effective Decisions)

Delivering Outcomes (Civil Service Behaviour Equivalent: Delivering at Pace)

To help you prepare your application, further information on [Civil Service Behaviours](#) can be found here.

Benefits

Rewards and benefits:

At NCSC and GCHQ, we are proud of our inclusive and supportive working environment, which is designed to encourage open minds and positive attitudes. As an organisation that values and nurtures talent, we are committed to helping you fulfil your potential. With comprehensive training and development opportunities tailored to your needs and the requirements of your work, we will enable you to flourish in your role and perform to the very best of your abilities.

You will receive a starting salary of £37,892 which includes a concessionary payment of £2,758.

Candidates with technical skills in information assurance, data science, or related fields may qualify for specialist skills payments ranging from £5,000 to over £44,000 per annum in this role. Skills will be assessed at interview.

For roles based in London, you will receive an additional £6,250 London Allowance.

Other benefits include:

- 25 days' annual leave, automatically rising to 30 days after five years' service, plus an additional 10.5 days of public and privilege holidays
- opportunities to be recognised through our employee performance scheme

- an interest-free season ticket loan

- a cycle-to-work scheme

Facilities such as a subsidised gym, restaurant and on-site coffee bars (at some locations)

Paid parental and adoption leave

Excellent pension scheme - [Civil Service pension](#)

Equal opportunities

At GCHQ, diversity and inclusion are critical to our mission. To protect the UK, we need a truly diverse workforce that reflects the society we serve. This includes diversity in every sense of the word: those with different backgrounds, ages, ethnicities, gender identities, sexual orientations, ways of thinking and those with disabilities or neurodivergent conditions. We therefore welcome and encourage applications from everyone, including those from groups that are under-represented in our workforce such as women, people from ethnic minority backgrounds, people with disabilities and those from low socio-economic backgrounds.

[Find out more about our culture, working environment and diversity on our website.](#)

Disability Confident

GCHQ is proud to have achieved Leader status within the Department for Work and Pensions Disability Confident scheme. This is aimed at encouraging employers to think differently about disability and take action to improve how they recruit, retain and develop disabled people. As a Disability Confident Leader, we aim to ensure that a fair and proportionate number of disabled applicants who best meet the essential minimum criteria for this position are offered an interview, where it is practical for us to do so. This is known as Offer of an Interview.

To secure an interview for this role, you must meet the following minimum criteria, which will be assessed at the CV sift stage:

You'll be required to reach the minimum pass mark for the online Situational Judgement Test (SJT), which assesses criteria important for all roles in our organisation.

Demonstrate your experience at a basic level of the development and use of AI Technology and or agent development.

Demonstrate your ability to understand and work with new technologies quickly. Technical experience and/or education, including one or more of:

software development, or designing and building systems architectures or technical research and analysis.

There is a wide range of extra support available throughout the recruitment process to enable you to do your best. Please see our website for information on [reasonable adjustments we can offer](#).

Things you need to know

Artificial intelligence

Artificial intelligence can be a useful tool to support your application, however, all examples and statements provided must be truthful, factually accurate and taken directly from your own experience. Where plagiarism has been identified (presenting the ideas and experiences of others, or generated by artificial intelligence, as your own) applications may be withdrawn and internal candidates may be subject to disciplinary action. Please see our [candidate guidance \(opens in a new window\)](#) for more information on appropriate and inappropriate use.

Selection process details

What to expect

Our recruitment process is fair, transparent and based on merit. Here is a brief overview of each stage, in order:

1. Initial online application.
2. Online Situational Judgement Test (SJT) in which you rate the appropriateness of responses to a series of short scenarios.
3. Application sift.
4. Online Interview.
5. If successful, you will receive a conditional offer of employment.

Please note you must successfully pass each stage of the process to progress to the next. Your application may take around 6 to 9 months to process including vetting, so we advise you to continue in your current employment until you have received your final job offer.

Before you apply

To work at NCSC, you need to be a British citizen or hold dual British nationality. You can [read our full eligibility criteria here](#).

This role requires the highest security clearance, known as Developed Vetting (DV). It's something everyone in the UK Intelligence Community undertakes. You can [find out more about the vetting process here](#).

Please note we have a strict drugs policy, so once you start your application, you can't take any recreational drugs, and you'll need to declare your previous drug use at the relevant stage.

Before you apply, we recommend setting up a separate email address for your contact with us, to ensure your personal and application correspondence remain separate. Try to avoid having identifying features in your email address, such as your first and/or surname and date of birth. This is good practice and will help you to manage your application with us more securely.

The role is based in **London or Manchester**, so you'll need to live within a commutable distance. Please consider any financial implications and practicalities before submitting an application, as we do not offer relocation costs.

We offer reasonable reimbursement of travel costs for candidates attending in-person appointments during the recruitment and vetting process. Full details will be provided with your interview or assessment invitation.

Reimbursement is discretionary and will only be made in line with the Candidate Expenses Policy, as amended from time to time. Candidates must book their own travel using the most economical option and provide original hard copy receipts for reimbursement.

Please note that you should only launch your application from within the UK. If you are based overseas, you should wait until you visit the UK to launch an application. Applying from outside the UK will impact on our ability to progress your application. You should not discuss your application with anyone other than with your partner or a close family member.

The closing date for this role is: 2nd September 2026 at 23:55

Right to withdraw statement:

Please be aware that we reserve the right to bring forward the closing date for this role once a certain number of applications have been received. Please submit your application at the earliest opportunity to avoid disappointment.

Feedback will only be provided if you attend an interview or assessment.

Security

Successful candidates must meet the security requirements before they can be appointed. The level of security needed is [developed vetting \(opens in a new window\)](#).

[See our vetting charter \(opens in a new window\)](#).

People working with government assets must complete [baseline personnel security standard \(opens in new window\)](#) checks.

Medical

Successful candidates will be expected to have a medical.

Nationality requirements

Open to UK nationals only.

Working for the Civil Service

Please note this Post is NOT regulated by the Civil Service Commission.

The Civil Service embraces diversity and promotes equal opportunities. As such, we run a Disability Confident Scheme (DCS) for candidates with disabilities who meet the minimum selection criteria.

Diversity and Inclusion

The Civil Service is committed to attract, retain and invest in talent wherever it is found. To learn more please see the [Civil Service People Plan \(opens in a](#)

[new window](#)) and the [Civil Service Diversity and Inclusion Strategy \(opens in a new window\)](#).
