Job description

The SharePoint-based HMRC intranet provides business information and communications to 67,000 colleagues. We want colleagues to have high quality tools to help them do a professional job with the intranet providing a fast, frictionless, relevant digital experience.

As Senior Developer, you'll build an intimate knowledge of the product, and users' experience of the product, to help identify improvements, and work with the Development Team Lead and Lead Product Manager to implement the product roadmap.

You will be part of a multi-disciplinary team, working alongside a SharePoint Support Developer, Business Analyst, Project Manager, a dedicated content team and supporting a community of content creators across the organisation. The team will strive to fully understand the colleague experience and technical overheads that requirements bring, to maintain a consistent message and experience in the intranet's roadmap.

You will also maintain relationships with HMRC's Chief Digital Information Officer Group and the Transforming our Intranet programme to specify and commission improvements that go beyond day-to-day maintenance.

As a specialist in SharePoint, you'll be part of a broader, growing community of SharePoint specialists across HMRC to share and grow your knowledge. You will support the content community to develop relevant knowledge and skills to edit and upload accessible content. As part of the team, you will help design and deliver relevant training.

To act as the escalation and liaison point for all intranet related incidents

To contribute to the development of, and implement, the intranet's product roadmap, which could include creating, managing and delivering processes

and development plans

To act as an adviser on publishing best practices and accessibility standards

Support the business to transition independent SharePoint intranet sites into the SharePoint intranet in line, as agreed

Lead by example through your work across the public sector, with the intranet helping other teams understand the art of the possible with SharePoint.

Essential Criteria:

Experience of building, maintaining and developing SharePoint sites, using Agile principles to balance competing demands.

Experience leading in a live service environment, managing incidents at pace and delivering a product roadmap as part of a multidisciplinary product team, both technical and non-technical.

Deep knowledge and experience of the Microsoft 365 suite and capabilities, in particular the Power Platform suite of products, including workflows using Power Automate .

An aptitude for coding and syntax, with the ability to debug code, create complex and non-complex formulas in Excel and Power Automate.
