About the job

Job summary

Please find a candidate pack linked at the bottom of the page.

What is Government Digital Service?

[Government Digital Service](#) (GDS) is the digital centre of government. We set, lead and deliver the vision for a modern digital government, harnessing technologies and talent to make a serious impact across the public sector. We employ more than 1,000 people all over the UK, with hubs in Manchester, London and Bristol. We're home to the Incubator for Artificial Intelligence (i.AI) and the world-leading [GOV.UK](#) website.

Where you'll be working

You'll join the Office of the Chief Technology Officer (OCTO), the directorate responsible for delivering key government technology strategies and initiatives, like the market-shaping [Cloud Challenge Book](#) and public sector technology learning through [Get Tech Certified](#).

Led by the Government Chief Technology Officer, OCTO sets cross-government technology strategy, technical standards, and shared architectural patterns to drive digital transformation and interoperability across public services.

We lead the Engineering, Architecture and IT Operations professions across the public sector. We provide the guidance, tools, methodologies, communities, research and events that thousands of technology professionals rely on to do their jobs.

The problems we're solving

Government runs on technology the public relies on every day, but much of it is ageing, fragmented, and at risk.

While government technology has real strengths, its maturity varies significantly across teams, services, and organisations. Some areas are modern, well-run and highly capable; others are still dependent on old

systems, fragile infrastructure, and accumulated legacy and technical debt.

That's where we come in: our mission is to build Firmer Foundations for Government, a core pillar of the Government's [Blueprint for Modern Digital Government](#). We're working with leaders across government and the wider public sector to mitigate the risks of legacy and ageing technology.

New and emerging technologies are part of the answer. They offer better ways to design, build and run services and improve resilience for the public. But they also make the need to act more urgent: government needs stronger foundations now if it is to adopt new technologies safely, responsibly and at scale.

Join OCTO, and you'll help shape how government tackles the challenge of legacy technology and harnesses the power of emerging technologies. You will also have the opportunity to support and influence thousands of technology professionals across the public sector who are building the services the public relies on every day.

Job description

Please Note - Former DSIT recruitment campaigns are continuing as usual, but candidates should be aware that following the [Government s announcement](#) on the changes to some civil service departments, roles will be subject to the machinery of government moves and will ultimately be in one of the new departments. We will provide more information if you are selected for a role. This work remains of high importance to the civil service, and we thank you for your continued interest.

What you'll do as a Technical Architect

This is not your normal Architecture role; it offers the opportunity to make an impact at a serious scale. You may be asked to work across a range of technical disciplines and opportunities, and you will help millions of people in government and the public sector to access services they need.

You will be aligned to a Grade 6 Principal Technical Architect who will mentor and support you, as well as set you challenging tasks to further your team s objectives. This will include opportunities to directly influence finding solutions to some of the nation s highest-priority digital challenges.

Our teams in OCTO are routinely involved in critical, flagship activities such as:

- the creation of market shaping material like [the Cloud Challenge Book](#)

- providing free digital, data and technology learning and certification opportunities for the whole public sector through [Get Tech Certified](#)

- authoring assessments into how effectively the public sector uses digital technology such as the [State of Digital Government Review](#)

- enabling the government and public sector to harness the power of AI technology safely, effectively and responsibly through the [AI Playbook for the UK Government](#)

- supporting commercial engagements worth billions of pounds

- providing policy decisions and advice based on the most current market trends, such as guidance on [AI, open code and vulnerability risk in the public sector](#)

- presenting advice and thought leadership to other international governments, our suppliers and other policy areas across government

- responding to pan-government technology questions from ministers and support committee hearings

This is a role with unlimited space to grow and make a major impact on the UK's digital strategy.

Your responsibilities include:

- lead on research and pieces of work, supporting the Principal Technical Architect to develop a 10-year strategy within your specialism

- working with stakeholders to shape government digital strategy, translating complex technical concepts into straightforward language to influence senior decision makers

- supporting the delivery of technologies that have a positive impact on users

- developing a network of peers, building credibility and improving communication

- promoting your work through speaking engagements and hosting community events

helping to upskill others within OCTO and GDS in your specialist area

Person specification

About you

You should work in a technical profession aligned to the Architecture, Data, IT Operations or Software Development specialisms, either within the Government Digital and Data Framework, or in a similar large-scale digital-first commercial environment. You should also hold or be working towards relevant industry certifications for your technical specialism.

Your proven skills will include:

- experience helping to deliver technology-related change to support wider organisational objectives

- technical experience which you have used to build credibility with others, evaluate proposals and create design approaches characterised by high risk, impact, and complexity

- ability to translate complex concepts into straightforward language to present to senior stakeholders, both technical and non-technical

- experience working with technology suppliers

- sharing your learnings and expertise with others, with the ability to adapt feedback to ensure it is effective and lasting

Benefits

There are many benefits of working at GDS, including:

- flexible hybrid working with flexi-time and the option to work part-time or condensed hours

- a Civil Service Pension with an average employer contribution of 28.97%

- 25 days of annual leave, increasing by a day each year up to a maximum of 30 days

- an extra day off for the King's birthday

- an in-year bonus scheme to recognise high performance

career progression and coaching, including a training budget for personal development

a focus on wellbeing with access to an employee assistance programme

job satisfaction from making government services easier to use and more inclusive for people across the UK

advances on pay, including for travel season tickets

death in service benefits

cycle to work scheme and facilities

access to an employee discounts scheme

10 learning days per year

volunteering opportunities (5 special leave days per year)

access to a suite of learning activities through Civil Service learning

Any move to Government Digital Service from another employer will mean you can no longer access childcare vouchers. This includes moves between government departments. You may however be eligible for other government schemes, including Tax Free Childcare. Determine your eligibility at <https://www.childcarechoices.gov.uk>

Office attendance

The Department operates a discretionary hybrid working policy, which provides for a combination of working hours from your place of work and from your home in the UK. The current expectation for staff is to attend the office or non-home based location for 40-60% of the time over the accounting period.

DSIT does not normally offer full home working (i.e. working at home); but we do offer a variety of flexible working options (including occasionally working from home).

Townhall Event

We are hosting a Townhall event to discuss this role, and the wider work undertaken in OCTO on Thursday 17th September 2026, from 11:00 - 12:00. Joining details below.

Things you need to know

Artificial intelligence

Artificial intelligence can be a useful tool to support your application, however, all examples and statements provided must be truthful, factually accurate and taken directly from your own experience. Where plagiarism has been identified (presenting the ideas and experiences of others, or generated by artificial intelligence, as your own) applications may be withdrawn and internal candidates may be subject to disciplinary action. Please see our [candidate guidance \(opens in a new window\)](#) for more information on appropriate and inappropriate use.

Selection process details

The standard selection process for roles at GDS consists of:

- a simple application screening process - We only ask for a CV and answer 2 application questions.

- A Video Submission Stage

- a 60 minute video interview which will feature a presentation, details of the presentation will be shared with invited candidates prior to the interview

Depending on how many applications we get, there might also be an extra stage before the video interview, for example a phone interview or a technical exercise.

In the event we receive a high volume of applications, we will conduct the initial sift against the lead criteria which is: **Describe a time when you used your technical background to set strategic priorities that an organisation or multiple organisations have adopted.**

In the Civil Service, we use [Success Profiles](#) to evaluate your skills and ability. This gives us the best possible chance of finding the right person for the job, increases performance and improves diversity and inclusivity. We'll be

assessing your technical abilities, skills, experience and behaviours that are relevant to this role.

For this role we ll be assessing you against the following [Civil Service Behaviours](#):

- Seeing the Big Picture
- Communicating and influencing
- Working Together
- Making Effective Decisions

We ll also be assessing your experience and specialist technical skills against the following skills defined in the Government Digital and Data Capability Framework for the [Lead Technical Architect](#) role:

- Architect for the whole context
- Making architectural decisions
- Strategy design
- Architecture communication

Want to know more about who Government Digital and Data are? [Click Here](#)

Recruitment Timeline

Townhall Event: 17/9/2026 - 11:00 - 12:00

Sift completion: 5th October 2026

Video Submission Stage: 6th - 13th October 2026

Panel interviews: Starting from 20th October 2026

Candidates that do not pass the interview but have demonstrated an acceptable standard may be considered for similar roles at a lower grade.

A reserve list will be held for a period of 12 months, from which further appointments can be made.

The Civil Service is committed to attract, retain and invest in talent wherever it is found. To learn more please see the [Civil Service People Plan](#) and [the Civil Service D&I Strategy](#).

Sponsorship

DSIT cannot offer Visa sponsorship to candidates through this campaign. DSIT holds a Visa sponsorship licence but this can only be used for certain roles and this campaign does not qualify.

Feedback will only be provided if you attend an interview or assessment.

Security

Successful candidates must undergo a basic (or equivalent) criminal record check.

People working with government assets must complete [baseline personnel security standard \(opens in new window\)](#) checks.

Nationality requirements

This job is broadly open to the following groups:

- UK nationals

- nationals of the Republic of Ireland

- nationals of Commonwealth countries who have the right to work in the UK

- nationals of the EU, Switzerland, Norway, Iceland or Liechtenstein and family members of those nationalities with settled or pre-settled status under the [European Union Settlement Scheme \(EUSS\) \(opens in a new window\)](#)

- nationals of the EU, Switzerland, Norway, Iceland or Liechtenstein and family members of those nationalities who have made a valid application for settled or pre-settled status under the European Union Settlement Scheme (EUSS)

- individuals with limited leave to remain or indefinite leave to remain who were eligible to apply for EUSS on or before 31 December 2020

Turkish nationals, and certain family members of Turkish nationals, who have accrued the right to work in the Civil Service

[Further information on nationality requirements \(opens in a new window\)](#)

Working for the Civil Service

The [Civil Service Code \(opens in a new window\)](#) sets out the standards of behaviour expected of civil servants.

We recruit by merit on the basis of fair and open competition, as outlined in the Civil Service Commission's [recruitment principles \(opens in a new window\)](#).

The Civil Service embraces diversity and promotes equal opportunities. As such, we run a Disability Confident Scheme (DCS) for candidates with disabilities who meet the minimum selection criteria.

The Civil Service also offers a Redeployment Interview Scheme to civil servants who are at risk of redundancy, and who meet the minimum requirements for the advertised vacancy.

Diversity and Inclusion

The Civil Service is committed to attract, retain and invest in talent wherever it is found. To learn more please see the [Civil Service People Plan \(opens in a new window\)](#) and the [Civil Service Diversity and Inclusion Strategy \(opens in a new window\)](#).

Apply and further information

This vacancy is part of the [Great Place to Work for Veterans \(opens in a new window\)](#) initiative.

The Civil Service welcomes applications from people who have recently left prison or have an unspent conviction. [Read more about prison leaver recruitment \(opens in new window\)](#).
