About the job

Job summary

The Department for Business and Trade (DBT) has a clear mission - to grow the economy. Our role is to help businesses invest, grow and export to create jobs and opportunities right across the country. We do this in three ways.

Firstly, we help to build a strong, competitive business environment, where consumers are protected and companies rewarded for treating their employees properly.

Secondly, we open international markets and ensure resilient supply chains. This can be through Free Trade Agreements, trade facilitation and multilateral agreements.

Finally, we work in partnership with businesses every day, providing advance, finance and deal-making support to those looking to start up, invest, export and grow.

The Digital, Data and Technology (DDaT) directorate develops and operates tools and services to support us in this mission.

About the role

As a Senior Site Reliability Engineer Manager, you will lead the design, delivery and continuous improvement of reliable, scalable and secure platform services that underpin critical DBT digital products. Working closely with multidisciplinary, agile teams, you'll ensure development teams have the tools and support they need from observability and monitoring through to CI/CD pipelines, so services are resilient, performant and centred around user needs. You'll champion good engineering practices, helping teams adopt service-level thinking using metrics, service-level indicators (SLIs), objectives (SLOs) and error budgets to support informed, collaborative decision making.

This is a people-focused leadership role where you will create an environment in which engineers can do their best work. You will line manage and develop a team of Site Reliability Engineers, supporting their growth and wellbeing,

while also acting as a senior technical leader across the wider DDaT community. You will work in partnership with product managers, architects and delivery colleagues to shape platform strategy, improve reliability and reduce operational burden. Alongside hands-on engineering, you will help build and scale our global platform, support live services through an on-call rota, and lead improvements such as enhancing observability and streamlining deployment processes to improve service quality and delivery outcomes.

Job description

You will:

Lead and support a team of Site Reliability Engineers, setting clear direction while fostering an inclusive, collaborative and high-performing team culture.

Build strong working relationships with product, delivery and architecture colleagues to ensure platform services meet business and user needs.

Provide technical leadership across DevOps/SRE practices, guiding teams to adopt approaches that support reliability, sustainability and continuous improvement.

Coach, mentor and support engineers across DDaT, contributing to a supportive and diverse engineering community.

Design, build and maintain reliable, secure and scalable cloud-based infrastructure using infrastructure-as-code approaches.

Enable teams to develop effective observability practices, including monitoring, logging, metrics and alerting that support proactive service management.

Work with teams to define and embed Service Level Indicators (SLIs), Service Level Objectives (SLOs) and error budgets in a pragmatic and user-focused way.

Support the development and continual improvement of CI/CD pipelines to enable safe, frequent and low-risk delivery of changes.

Oversee live service reliability, supporting teams through incident and problem management while encouraging a learning-focused, blameless culture.

Ensure security, resilience and compliance considerations are understood and embedded into engineering practices.

What tech will you be using?

AWS and Azure

GitHub Actions, AWS CodePipelines/CodeBuild

Terraform

Docker, Elastic Container Service (ECS) and Elastic Container Registry (ECR)

ElasticSearch/OpenSearch

Python and Django framework

PostgreSQL as a service (Amazon RDS)

Datadog, Logstash

Redis/Elasticache

Person specification

It is essential that you have:

Experience leading, supporting and developing engineers, including line management or strong mentoring experience.

Strong communication skills, with the ability to explain technical concepts clearly and build effective relationships with a range of stakeholders.

Experience of working with cloud platforms such as AWS, Azure or Google Cloud, applying modern DevOps and SRE practices.

Experience designing and delivering infrastructure-as-code solutions using tools such as Terraform, CloudFormation or similar.

Ability to write clean, maintainable and well-tested code in at least one programming language.

Experience designing, operating and improving distributed systems, with a focus on reliability, performance and user impact.

Benefits

Learning and development tailored to your role

An environment with flexible working options

A culture encouraging inclusion and diversity

A Civil Service pension with an employer contribution of 28.97%

Things you need to know

Artificial intelligence

Artificial intelligence can be a useful tool to support your application, however, all examples and statements provided must be truthful, factually accurate and taken directly from your own experience. Where plagiarism has been identified (presenting the ideas and experiences of others, or generated by artificial intelligence, as your own) applications may be withdrawn and internal candidates may be subject to disciplinary action. Please see our [candidate guidance \(opens in a new window\)](#) for more information on appropriate and inappropriate use.

Selection process details

How to apply

As part of the [application process](#) you will be asked to upload a 2-page CV which outlines your experience, skills and fit for the role, and go through a multi-stage screening process. If you're longlisted, you'll be asked to complete a short, pre-recorded video screening interview (alternately you can provide written answers to questions). Inspire People will assess your full application against the essential criteria listed above to compile a shortlist of applications, which will then be sifted by DBT hiring managers. If you are successful, you will be invited to interview.

It is likely that the sift will take place 1-2 weeks after the closing date and interviews 3-5 weeks after the closing date, though this is subject to change.

How we interview

At the [interview stage](#) for this role, you will be asked to demonstrate relevant Technical Skills and Behaviours from the [Success Profiles](#) framework. A role-specific list of these can be found below.

The technical element within the interview, where you will be asked a series of questions to demonstrate your specific professional skills and knowledge related directly to the job role and context, will assess against capabilities which are outlined under DevOps engineer within the DDaT framework which can be found [here](#). As part of this process, you will be asked to complete a technical problem-solving exercise during your interview. Further details will be provided following sift.

Technical Skills

- Availability and capacity management
- Development process optimisations
- Information security
- Modern standards approach
- Programming and build (software engineering)
- Prototyping (with MVP and POC)
- Systems integration
- User focus

Behaviours

- Communicating and Influencing
- Developing Self and Others

How we offer

Offers may be made in merit order based on location preferences. If you pass the bar at interview but are not the highest scoring you will be held on a 12-month reserve list in case a role becomes available. If you are judged a near miss at interview, you may be offered a post at the grade below the one you applied for.

This role requires [SC clearance](#). DBT's requirement for SC clearance is to have been present in the UK for at least 3 of the last 5 years. Failure to meet this requirement will result in your application being rejected and your offer will be withdrawn.

Checks will also be made against:

- departmental or company records (personnel files, staff reports, sick leave reports and security records)

- UK criminal records covering both spent and unspent criminal records

- your credit and financial history with a credit reference agency

- security services record

- location details

More about us

This role can only be worked from within the UK, not overseas. If you are based in London, you will receive London weighting. DBT employees are contracted to work in a hybrid pattern, spending 2-3 days a week (pro rata) in the office. Travel to your primary office location will not be paid for by DBT, but costs for travel to an office which is not your main location will be covered.

You can find out more about our office locations, how we calculate salaries, our diversity statement and reasonable adjustments, the Recruitment Principles, the Civil Service code and our complaints procedure on [our website](#).

Find out more about life at DBT, our benefits and meet the team by watching our [video](#) or reading [our blog!](#)

Feedback will only be provided if you attend an interview or assessment.

Security

Successful candidates must undergo a criminal record check.

Successful candidates must meet the security requirements before they can be appointed. The level of security needed is [security check \(opens in a new window\)](#).

[See our vetting charter \(opens in a new window\)](#).

People working with government assets must complete [baseline personnel security standard \(opens in new window\)](#) checks.

Nationality requirements

This job is broadly open to the following groups:

UK nationals

nationals of the Republic of Ireland

nationals of Commonwealth countries who have the right to work in the UK

nationals of the EU, Switzerland, Norway, Iceland or Liechtenstein and family members of those nationalities with settled or pre-settled status under the [European Union Settlement Scheme \(EUSS\) \(opens in a new window\)](#)

nationals of the EU, Switzerland, Norway, Iceland or Liechtenstein and family members of those nationalities who have made a valid application for settled or pre-settled status under the European Union Settlement Scheme (EUSS)

individuals with limited leave to remain or indefinite leave to remain who were eligible to apply for EUSS on or before 31 December 2020

Turkish nationals, and certain family members of Turkish nationals, who have accrued the right to work in the Civil Service

[Further information on nationality requirements \(opens in a new window\)](#)

Working for the Civil Service

The [Civil Service Code \(opens in a new window\)](#) sets out the standards of behaviour expected of civil servants.

We recruit by merit on the basis of fair and open competition, as outlined in

the Civil Service Commission's [recruitment principles \(opens in a new window\)](#).

The Civil Service embraces diversity and promotes equal opportunities. As such, we run a Disability Confident Scheme (DCS) for candidates with disabilities who meet the minimum selection criteria.

The Civil Service also offers a Redeployment Interview Scheme to civil servants who are at risk of redundancy, and who meet the minimum requirements for the advertised vacancy.

Diversity and Inclusion

The Civil Service is committed to attract, retain and invest in talent wherever it is found. To learn more please see the [Civil Service People Plan \(opens in a new window\)](#) and the [Civil Service Diversity and Inclusion Strategy \(opens in a new window\)](#).

Apply and further information

This vacancy is part of the [Great Place to Work for Veterans \(opens in a new window\)](#) initiative.

The Civil Service welcomes applications from people who have recently left prison or have an unspent conviction. [Read more about prison leaver recruitment \(opens in new window\)](#).
